PROFILE

Security-focused Computer Science student building real-time detection systems and practical backend tools. Hands-on with network traffic analysis, Python/Django development, and applying machine learning to tell real threats apart from normal noise. Actively pursuing the ISC² Certified in Cybersecurity (CC), and looking ahead to internships in network security and backend engineering.

EDUCATION

Darshan University <i>B.Tech in Computer Science & Engineering</i>	Rajkot, Gujarat 2025 – Present
Government Polytechnic Jamnagar <i>Diploma in Computer Engineering</i>	Jamnagar, Gujarat 2021 – 2025

EXPERIENCE

Elevate Labs <i>Cyber Security Intern</i>	Remote Oct. 2025 – Dec. 2025
- Completed a hands-on cybersecurity internship covering vulnerability assessment, secure coding practices, and network defense fundamentals. - Applied practical security analysis techniques to identify and document common web and network vulnerabilities.	
Adhir Infotech <i>Intern</i>	Jamnagar, Gujarat Jun. 2024 – Aug. 2024
- Contributed to backend development tasks and gained hands-on exposure to real-world software development workflows. - Collaborated with the engineering team to debug, test, and refine application features.	

PROJECTS

Project Plexus <i>Python, FastAPI, Scapy, XGBoost, React, WebSockets</i>
- Built a real-time Network Intrusion Detection System combining a Scapy-based packet capture engine with a FastAPI backend, streaming live traffic to a React dashboard over WebSockets. - Trained a Random Forest / XGBoost classifier on the CICIDS2017 dataset to distinguish normal traffic from attack patterns in real time. - Implemented a hybrid rule-based and ML-based alerting pipeline with automated PDF incident report generation.
NetScope <i>Python, Packet Analysis</i>
- Developed a live packet capture and inspection tool for real-time network monitoring at the protocol level. - Built filtering and anomaly-oriented monitoring logic to strengthen traffic visibility and analysis fundamentals.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL
Frameworks & Libraries: Django REST Framework, FastAPI, React, Scapy, XGBoost
Developer Tools: Git, Docker, Linux, Kali Linux, Wireshark

CERTIFICATIONS

ISC² Certified in Cybersecurity (CC) – In Progress, Exam Targeted 2027
Cyber Security Virtual Internship Certificate – Elevate Labs, 2025
